MORE POWER MORE DURABLE TO YOUR ROOF

MANUFACTURING PROCESS OF BUTTERFLY ROOF TILES

- 1) Raw Material Control
- 2) Ball Milling
- 3) Shaping and Pressing
- 4) Drying and Glazing Process
- 5) Firing Process
- 6) Quality Control
- 7) Sorting & Packaging
- 8) Finished product)

RAW MATERIAL CONTROL

Large capacity of raw material to ensure our production

BALL MILLING

Formulary of mixing to ensure the quality of Butterfly Roof Tiles

SHAPING AND PRESSING

The material are compressed in a steel cavity by steel plungers and are then ejected by the bottom plunger. Automated presses are used with operating pressures as high as 3 tons

DRYING & GLAZING PROCESS

Using Air Blow Machine for Faster Drying Process

FIRING PROCESS

Butterfly invest in huge technology on the firing process by using a combination of electronic and gas technology. This technology ensures all parts of the tile are thoroughly and completely fired at a temperature of

1100°C to 1200°C, otherwise it will effected the capability of shaping and strength.

QUALITY CONTROL

By using computerized scanning, all imperfect tiles are identified and disposed.

PACKING

Butterfly Roof Tiles are packed in bundles / cartons. Whether 5 or 6 Pcs in a bundle/ carton will depend on each series

STORING

Butterfly has enough stock to fulfill the demand of our customers

Roof Tiles That Bring Smiles!
Clay Tiles From **Butterfly**

THE PROMINENT CHOICE IN **QUALITY ROOFING**

Butterfly International is a large and modern roof tiles manufacturer and supplier in Asia with an annual capacity of over 12,000,000 square meters. Established in late 1970's, It has over 33 years of history in roof tiles manufacturing. The company has brought workflow automation into reality through its fully automatic roller kilns and advanced technology imported from Italy.

Our products are available in a variety of colors. The roof tiles have fading resist, anti-cracked feature and water resistance. Its natural, mild lusterless glazed tiles are the preferred roof materials for high-grade apartments, residences and villas.

Butterfly Roof tile attaches importance to scientific research and technical development satisfy user's demands. The company has also obtained the certification under ISO9001:2000 International Quality Control System.

Butterfly roof tiles are reputed locally and abroad, including Asia, Europe and US. Its dynamic marketing and operations system have also enabled the company to enjoy rapid growth. Butterfly roof tiles complemented by top quality and supported by innovative technologies brings stylish looks to your home.
